BREMERTON TO HAVE BETTER NAVY YARDS

Secretary Daniels Says It Is
By Far the Best Site On
Pacific Coast

Washington, Oct. 25.—Secretary of the Navy Daniels today indicated that the next big development of Pacific coast navy yards would be at Bremerton, Wash.

"It is one of the finest, if not the finest on the west coast," said Secretary Daniels. "It is an all around admirable yard and especially capable of development. While we do not plan any extensive immediate enlargement of activities at the Pacific coast yards, when the fleet on the west coast is enlarged and the Panama canal made permanently available, I expect to have much more work done at the Bremerton yard."

Unlike the Mare Island navy yard, the naval head said the Bremerton yard has unusual facilities for development because of its deep water.

"The trouble at Mare Island," he said, "is the limited dockage. This is not true at Bremerton, which has ample room for expansion, with deep water available."

"We have not had many ships as far north as Bremerton, but with a larger fleet in Pacific waters and greater use of the Panama canal I expect the Bremerton yard to become of much more importance."

"It now has a dry dock 800 feet long, capable of building fairly large ships. This could be enlarged without great expense to build the largest battle-ships."
